

# Texas Hospital Association Foundation

## CLINICAL INITIATIVES AND QUALITY

Working to accelerate improvement in health care through collaboration and innovation.

### Who We Are

We have the unique opportunity to work closely with hospitals and systems around the state of Texas to help in their mission to advance quality and patient safety.

With more than 94 years of combined experience working in hospitals, THA's clinical initiatives team is here to help Texas hospitals advance quality and patient safety in the care they provide.

### What We Do

Texas hospitals have intensified their commitment to quality and patient safety by working together – leveraging their collective experiences and dedication – to move the needle on health care delivery.

Currently, we are focusing on the following projects:

- Critical Access Hospital Quality Improvement Program – Supporting small hospitals to take quality work to the next level
- Hospital Improvement Innovation Network – Reducing All-Cause Harm and Readmissions
- TexasAIM – Reducing Maternal Morbidity & Mortality in Texas

We also have a Patient Safety Organization (PSO) certified by the Agency for Healthcare Research and Quality (AHRQ) – providing PSO member hospitals a secure and protected environment for shared learning and the prevention of medical errors and harm events.
